## Projects

---

### Text Encryption App

- This App focuses on harnessing the power of Advanced Encryption Standard (AES) encryption to transform plain text into an unintelligible format, ensuring that sensitive information remains confidential and protected from unauthorized access.
- Technologies Used: Android Studio, Firebase; Languages Used: XML , Java

### College Counselling Website

- It is a dedicated initiative to simplify and enhance the way students access and experience college counseling.
- It offers an intuitive interface that allows students to effortlessly enter their rank or identification details, eliminating the need for cumbersome paperwork and reducing administrative overhead.
- Frontend: HTML, CSS, JavaScript; Backend: PHP, SQL, Xampp

### Movie Streaming Website

- This ongoing Project offers a vast collection of movies across genres and eras, providing an extensive selection for entertainment.
- Implemented API calls for enhanced functionality and user customization. Stay tuned for an even more immersive movie-watching experience. Brace yourself for an enhanced movie-watching experience, even though the backend development is still underway.
- Frontend: HTML, CSS, JavaScript, React
